

Authorized Retreads

Precure Waste Hauler Lug

Regional and Mixed Service Traction Applications

- Goodyear exclusive precure tread compound- developed to provide good cut, tear, chip and chunking resistance when used in the Waste Hauler Lug design in rough on and off road applications
- Open shoulders to provide good on/off highway traction , a traction in mud and snow conditions, in heavily loaded operation
- Open shoulders minimize cutting or lug tearing in heavily loaded operation, with 6-sided lug elements for circumferential traction
- 2-centerline “Z” lugs, 8-sided for good lateral & circumferential traction, overlapping each other on centerline for smoother highway riding
- Grooves between lugs allow a clean tread face, in contact with the road surface, in all weather conditions
- 26/32” tread depth standard – 28/32” and 32/32” available in tire sizes such 315/80R22.5
- For Regional and Mixed Service all position applications – including trailers in heavily loaded, stop start applications
